Projects

Personal Finance Tracker App | [Source Code](#)

NodeJS | Express | MySQL | React Native

- Engineered a **full-stack mobile application** using **React Native** and **Node.js**, implementing **RESTful APIs** for transaction management and user authentication.
- Designed and integrated a **MySQL database** to store and retrieve financial data efficiently.
- Developed **data-driven features** to analyze **spending patterns** and display **real-time financial insights**.

Portfolio Ranker | [Source Code](#)

Python | Flask | Scikit-learn | React (Vite)

- Built a full-stack portfolio analytics web app using **Flask APIs** and a **React** dashboard to simulate allocations, benchmark performance, and visualize results.
- Used **pandas**, **yfinance**, **scikit-learn** and **recharts** to compute **risk metrics**, **detect anomalies** and **classify risk**.

Fraud Detection System | [Source Code](#)

Python | FastAPI | MySQL | React (Vite)

- Designed and developed a **backend API system** using **FastAPI** and **MySQL** for processing and validating financial transaction data.
- Built an **end-to-end machine learning system** for **real-time classification** and **risk scoring**, integrating **data processing**, **model inference**, and **frontend visualization**.
- Built a **React-based dashboard** for visualizing system outputs and **transaction analytics**.

Movie-X-Movie | [Source Code](#)

React Native (Expo) | Appwrite | JavaScript

- Built a movie discovery app to search and explore films (including trending content) using a real-time **TMDB API** data.
- Developed a **React Native (Expo)** UI with **Appwrite** for data storage.
